## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim1-10, are drawn to a moisture control strip, classified in class 52, subclass 302.300.
- II. Claim11-12, are drawn to a method of manufacturing a moisture control strip, classified in class 29, subclass 603.16. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of group I can be made by a materially different process such as by casting or injection molding instead of machining.
